

## Features by Version

The following chart shows MDAemon features and the version in which they were introduced.

| Features for MDAemon Email Server                                                                  | Introduced In Version |
|----------------------------------------------------------------------------------------------------|-----------------------|
| <b>MDaemon Webmail</b> - Web Conferencing Server with Audio, Camera & Screen Sharing               | 25.5                  |
| <b>MDaemon Webmail</b> - "Send As" Permissions                                                     | 25.5                  |
| <b>MDaemon Webmail</b> - Contact Images in Message List                                            | 25                    |
| <b>MDaemon Webmail</b> - Long-press Contextual Menus for Mobile Devices                            | 25                    |
| <b>QR Code Detection</b>                                                                           | 25                    |
| <b>MDaemon Webmail</b> - Microsoft OneDrive Integration                                            | 24.5                  |
| <b>Authenticated Received Chain (ARC)</b>                                                          | 24                    |
| <b>MDaemon Webmail</b> - Temporary Links                                                           | 24                    |
| <b>MDaemon Webmail</b> - AI Email Assist                                                           | 23.5                  |
| <b>MDaemon Webmail</b> - Passwordless Authentication                                               | 23.5                  |
| <b>MDaemon Webmail</b> - Calendar Publishing & Appointment Scheduling                              | 23.5                  |
| <b>MDaemon Remote Administration</b> - Formatted Email View                                        | 23.5                  |
| <b>MDaemon Remote Administration</b> - Direct Edit of MDAemon Configuration Files                  | 23.5                  |
| <b>Security Health Check</b> - Optimization of MDAemon Server-side Spam Filter & Security Settings | 23.5                  |
| <b>MDaemon Remote Administration</b> - Passwordless Authentication                                 | 23.5                  |
| <b>MDaemon AntiVirus</b> - Anti-Spam Outbreak Protection from Data443                              | 23                    |
| <b>MDaemon AntiVirus</b> - IKARUS Security Malware Detection Engine (Replaces Cyren Antivirus)     | 23                    |
| <b>MDaemon Webmail</b> - Google Drive Integration                                                  | 23                    |
| <b>SSL Certificate Expiration Notifications</b>                                                    | 23                    |
| <b>Keyword Flags via IMAP</b>                                                                      | 23                    |
| <b>OAuth 2.0 Authentication</b>                                                                    | 23                    |
| <b>MDaemon AntiVirus</b> - Cyren Threat Lookup Service                                             | 22                    |
| <b>TLS 1.3 Support</b>                                                                             | 22                    |
| <b>MDaemon Webmail</b> - Support for CSRF (cross-site request forgery) tokens                      | 22                    |
| <b>MDaemon Remote Administration</b> - Support for CSRF (cross-site request forgery) tokens        | 22                    |
| <b>MDaemon Remote Administration</b> - Custom Remote & Local Queue Management                      | 22                    |
| <b>MDaemon ActiveSync</b> - Support for the ActiveSync 16.1 "Find" Command                         | 22                    |
| <b>MDaemon ActiveSync</b> - Drafts Folder & Calendar Event Attachment Sync                         | 21.5                  |
| <b>MDaemon Webmail</b> - Email Import                                                              | 21.5                  |
| <b>MDaemon Webmail</b> - Package Tracking                                                          | 21.5                  |
| <b>Application Passwords</b>                                                                       | 21.5                  |

1. For devices that support this feature.  
2. Does not support shared calendars, public and shared folders, or notes.

| Features for MDAemon Email Server                                                                                       | Introduced In Version                                                            |
|-------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| <b>MDaemon Webmail - Password Strength Meter</b>                                                                        | <b>21.5</b>                                                                      |
| <b>MDaemon Remote Administration - Password Strength Meter</b>                                                          | <b>21.5</b>                                                                      |
| <b>MDaemon Remote Administration - Change Logging</b>                                                                   | <b>21.5</b>                                                                      |
| <b>Dynamic Screening - Blocked IP Reports</b>                                                                           | <b>21.5</b>                                                                      |
| <b>Clustering - Multi-Node Mail Routing</b>                                                                             | <b>21</b>                                                                        |
| <b>MDaemon Webmail - New Mobile Theme Features (Instant Messenger, DropBox Support, Saved Searches, etc.)</b>           | <b>21</b>                                                                        |
| <b>MDaemon Instant Messenger - Persistent Chat Rooms</b>                                                                | <b>21</b>                                                                        |
| <b>MDaemon AntiVirus - Virus/Spam Misclassification Reporting</b>                                                       | <b>21</b>                                                                        |
| <b>ActiveSync Migration Client - New Graphical User Interface</b>                                                       | <b>21</b>                                                                        |
| <b>Clustering for Improved Protection Against System Interruptions</b>                                                  | <b>20</b>                                                                        |
| <b>Compromised Password Check - To prevent use of passwords found in a data breach</b>                                  | <b>20</b>                                                                        |
| <b>MTA Strict Transport Security (MTA-STS) - Improved Server Authentication &amp; Secure Message Delivery</b>           | <b>20</b>                                                                        |
| <b>RequireTLS - To Protect Against Unencrypted Email Delivery</b>                                                       | <b>20</b>                                                                        |
| <b>Authentication Failure Log</b>                                                                                       | <b>20</b>                                                                        |
| <b>Deferred Message Queue for Improved Email Delivery Performance</b>                                                   | <b>20</b>                                                                        |
| <b>MDaemon Webmail - Redesigned Mobile Theme with New Features Previously Only Found in Desktop Themes</b>              | <b>19.5</b>                                                                      |
| <b>MDaemon AntiVirus - Macro Detection in Email Attachments</b>                                                         | <b>19.5</b>                                                                      |
| <b>Centralized Management of Email Client Signatures</b>                                                                | <b>19.5</b>                                                                      |
| <b>MDaemon Webmail - Expired Session Notification</b>                                                                   | <b>19</b>                                                                        |
| <b>MDaemon Webmail - "All Unread" and "All Flagged" Saved Searches</b>                                                  | <b>19</b>                                                                        |
| <b>Dynamic Screening - Authentication Failure &amp; Frozen Account Reports</b>                                          | <b>19</b>                                                                        |
| <b>Domain-Specific SSL Certificates - Support for Separate SSL Certificates for Each Domain</b>                         | <b>19</b>                                                                        |
| <b>Email Signatures - Signature Macros</b>                                                                              | <b>18.5</b>                                                                      |
| <b>Location Screening - Exemptions for Webmail when Two-Factor Authentication is Used</b>                               | <b>18.5</b>                                                                      |
| <b>MDaemon Webmail - Integrated Instant Messaging</b>                                                                   | <b>18.5</b>                                                                      |
| <b>Single Installer - for All Licensed Features</b>                                                                     | <b>18</b>                                                                        |
| <b>DNSSEC - Enhanced Security to Avoid DNS Attacks</b>                                                                  | <b>18</b>                                                                        |
| <b>MDaemon Remote Administration - Remember Me</b>                                                                      | <b>18</b>                                                                        |
| <b>MDaemon Remote Administration - Set Security Features to their Recommended Settings</b>                              | <b>18</b>                                                                        |
